HOW TO USE THIS INDEX

Articles are arranged under broad subject categories as indicated in the contents list.

Within these categories articles are arranged chronologically by volume with the specific topic in bold type. The chronological order is interrupted only where several articles refer to the same topic.

The author, general topic, organisation, personality, place and synagogue indices refer directly to the physical volume of the AJHS Journal and not to pages in this cumulative index.

This index is not as comprehensive as the online index as it does not include book reviews or errata; however it gives full references for all entries.

An asterisk after a page number in volume 19 indicates the article can be found in part 4, which was accidentally numbered from 1-216 instead of 469-685.
